

# SILICONE RUBBER SHA 60

This material offers high inhibition resistance, low shrinkage, and excellent tear strength. The beige base and regal blue curing agent ensure uniform blending with a simple 10:1 mix ratio. It cures at room or elevated temperatures, allowing moulding in unlimited thickness, regardless of part configuration.

## GENERAL PROPERTIES

Base colour	Beige
Curing agent colour	Regal blue
Hardness	59 Shore A
Tensile strength	4.8 MPa
Elongation	200%
Tear strength	15 kN/m

## APPLICATIONS

Electrical insulators  
Medical Devices  
Custom keypads
